

CALL FOR PAPER

Journal of Statistical Research of Iran

The Editorial Board of JSRI invites the submission of manuscripts. Of special interest are articles in Official Statistics, Survey Methodology, survey sampling, environmental statistics, longitudinal data analysis, computational statistics, design of experiments, applied probability, multivariate analysis, nonparametric and semi-parametric inference, reliability and quality control, spatial statistics, distribution theory, asymptotic theory, biostatistics, Bayesian statistics, statistical decision theory, statistical methods in bioinformatics, survival analysis, stochastic processes, time series analysis, inference for stochastic processes, linear and nonlinear models, and probability models. This list of topics is not intended to be exhaustive.

Every attempt will be made to take a decision on a manuscript within 3-4 months of its submission without sacrificing the integrity of the refereeing and reviewing process.

The Journal of Statistical Research of Iran (JSRI) is an English periodical for reviewing original researches work in the mentioned fields, and statistical methods, sponsored by the statistical Research and Training Center (SRTC).

The aim of this journal is to provide a forum for significant theoretical developments and innovative applications of contemporary probability and statistics.

Additional information and guidelines for submission of manuscripts are available at the JSRI website: <https://www.jsri.srtc.ac.ir>.

Dr. Mojtaba Ganjali

Editor in Chief
